**MDA SCREWORM SUBMISSION FORM
(SHOULD ACCOMPANY SAMPLE)**

COLLECTION:

1. Gently remove larvae of different sizes with forceps from several sites of the wound. Ensure samples are also removed from the deepest tissue of the wound.
2. Place larvae in a leak-proof container/vial and fully submerge in 70% alcohol (ethanol or isopropyl).
3. Label the container/vial with animal ID, date/time of collection, location, and collector's name.
4. Seal the vial/container and place it in a sealable plastic bag. Place this bag into another sealable plastic bag.
5. Please complete a separate form for each animal sampled.

PLEASE PRINT AND COMPLETE ALL BLANKS IF POSSIBLE
